

# **EXHIBIT 1**

CARREKER, ALPHONSO

Many drugs are harmful to individuals in strenuous activity. There are some drugs that cannot be taken while under the influence of another drug. This includes the use of alcohol while taking certain drugs.

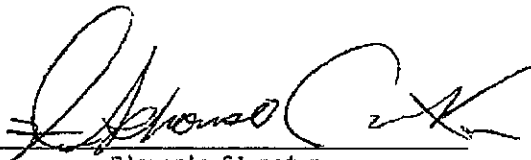

It is important that you discuss with the team doctor and/or trainer any drugs you are now taking.

Do not take any medication in the training camp or during the regular season unless they are given to you by the team physician or his agents employed by the club, (i.e. trainer, nurse, referred physician).

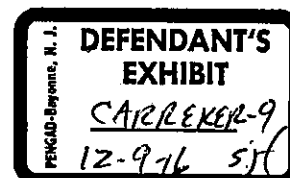

I understand the above.
